FilterBox

QUICK START

A calmer internet, in a minute

1

Plug in the power

Use the adapter that came in the box.

2

Connect the Ethernet cable

From the box to any free port on your router.

3

That is it

Filtering starts by itself. No app, no account, no settings.

Every device on your home Wi-Fi is protected — phones, tablets, computers and TVs.

See what it is blocking

Scan with your phone, or open
http://filterbox.lan

Nothing to install

Filtering covers every device automatically. The dashboard is optional — open it only if you are curious.

The full guide, in 18 languages

Scan with your phone camera — the guide opens in your browser.

IN THE BOX

FilterBox
Power adapter
Ethernet cable
microSD card (installed)

Model FB-R3S
